

Ruuvi Gateway A405

Software Update

All good! Update was successful.

The device will restart automatically after a few seconds. Continue with the configuration by reconnecting to the device's Wi-Fi hotspot. If the Wi-Fi hotspot doesn't appear automatically, locate the pinhole button under the power socket and press the button briefly using a paperclip.

Ruuvi Gateway A405

Software Update

For optimal performance, it's recommended to use the most up-to-date firmware for Ruuvi Gateway. You can update the firmware on this page if an update is available, or choose to skip the update and let Ruuvi Gateway update its firmware automatically when a new version is available.

Current firmware version: v1.15.0

Latest available firmware version: v1.14.3

An update is available! Press UPDATE to start the firmware update.
